

# Digitizing Medical Experience

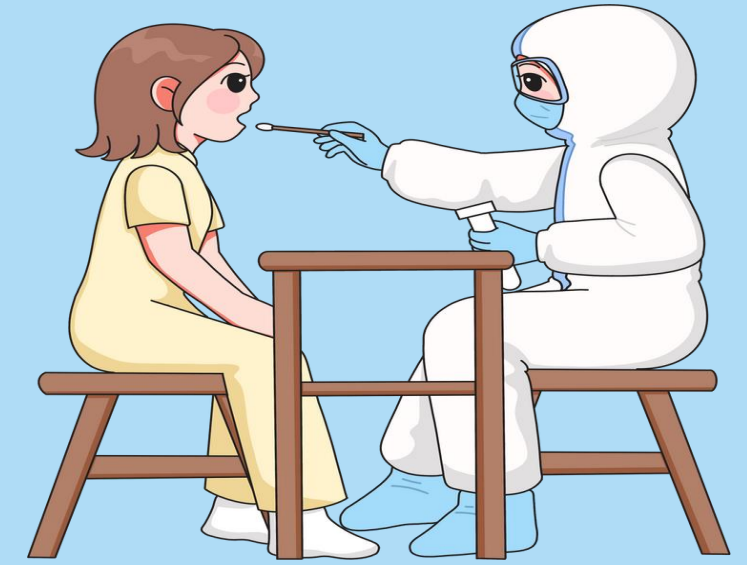

BY:

Adam Mitry, Ahmed Abdelkader,  
Hoda Hussein, Mohamed Khalil Brik,  
Rana Taher, Yasmina Mahdy

# A Background About The Area

- Doctor-Patient interactions are inefficient
- Accurate, Comprehensive Medical information is important
- Current Existing apps are not all-inclusive

# Why Our Approach?

**Optimized  
Scheduling**

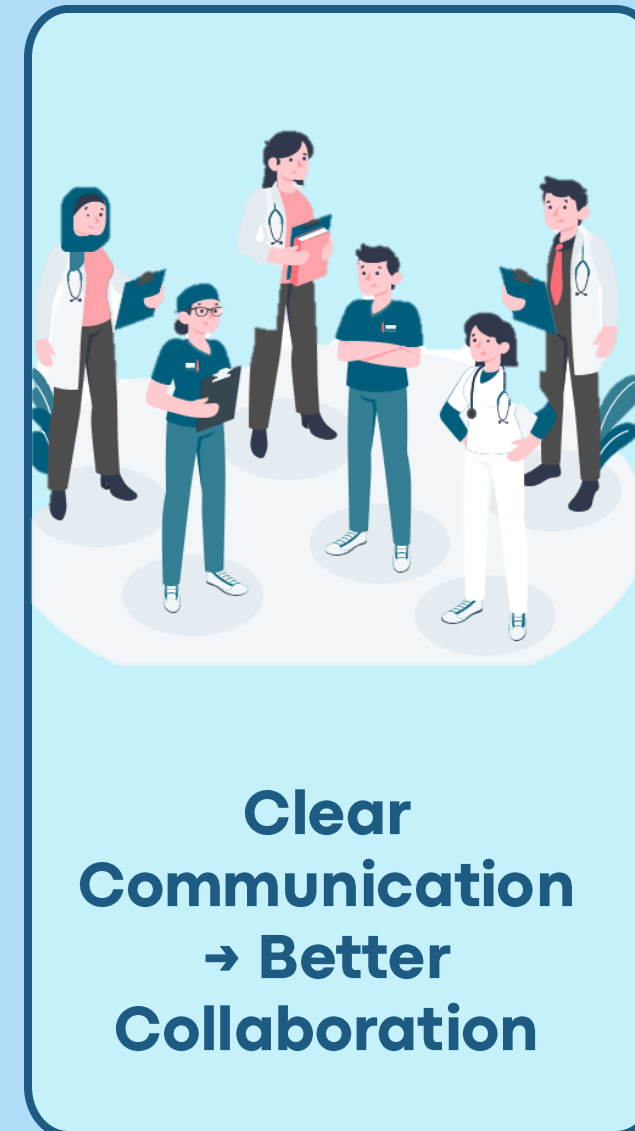

**Inclusive  
Platform**

**Privacy  
Compliant**

**Environment-  
ally Friendly**

**Clear  
Communication  
→ Better  
Collaboration**

**Time Saver**

**Accurate  
Diagnosis →  
Saving Lives**

# What We Will be Doing at a Very High Level

## Patient profile

- Medical history (smart suggestions)
- Prescription history

## Doctor profile

- Specialization
- Reviews
- Referrals

## Scheduling appointments

- Reminders for follow-ups/upcoming appointments
- Description of appointment
- Online/ in-person

## Pharmacy profile

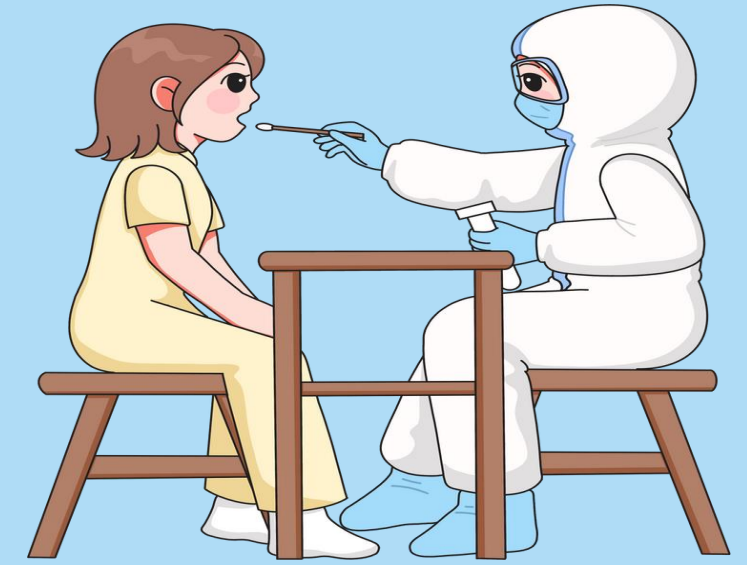

- Forward prescriptions
- Order Medication

## Emergency service

- Ambulance
- Live phone services

# Time Plan

- Milestone 1: 3 weeks
  - Research the current doctor-patient relations (3-5 days)
  - Product backlog + architecture (5-7 days)
  - Low Level Design + Documents (7 days)
  - Reviews + Adjustments (2 days)
- Milestone 2: 2 weeks
  - Planning + Backlog (3 days)
  - Development (6 days)
  - Testing (2 days)
  - Updating documents + designs (3 days)
- Milestone 3: 1.5 weeks
  - Planning + Backlog (2 days)
  - Development (5 days)
  - Testing (1 days)
  - Updating documents + designs (2 days)
- Milestone 4: 1 week
  - Finalizing documents (5 days)
  - Any final considerations (2 days)

# THANKS!
